- Docker, Postman, Zod, Blender,
Figma, Aseprite, Arduino

PROFILE

Computer Science graduate with project experience in web and game development. Highly motivated, quick to learn, and adaptable in various working environments. Strong teamwork, communication, and problem-solving skills, eager to apply knowledge and grow within a professional setting

UNIVERSITY PROJECTS

Game Developer

Pathogen Buster (2D Platformer) Final Project

- Collaborated in a team to produce a Unity-based educational game aimed at promoting health awareness, with gameplay mechanics, AI systems, animations, and testing

Fullstack Developer

Ecommerce Web App Personal Project

- Built with Next.js, Tailwind CSS, Sanity CMS, Stripe; skills in routing, dynamic pages & full-stack integration

Fullstack Developer

Code Tree (Student Relationship Tree Manager) Personal Project

- Developed a web-based visual tree editor enabling university students to create, share, and collaborate on mentor-mentee relationship hierarchies with drag-and-drop graph editing, multi-parent support, table/CSV management, and role-based access control, using Next.js, Go, gRPC, and Supabase

Flutter Developer

Income & Expense Tracker App Personal Project

- Flutter app with real-time data tracking and user authentication

WORK EXPERIENCE

Software Developer Intern (4 Months)

MFEC Public Company Limited

- **MSR VM Request Manager System**
 - Built an automated VM provisioning system with role-based authentication (User/Admin) and email workflows for approval tracking
 - Designed interfaces to capture critical specs (OS, CPU, RAM, HDD) ensuring compliance with security policies
- **DNS Request Manager System**
 - Developed a DNS management system to handle internal domain and IP mapping requests
 - Implemented automated workflows for submission and approval, enabling administrators to efficiently manage proposal statuses
 - Designed forms to capture network details (Source IP, Port, Domain Name) for accurate record-keeping

3 Nov – 20 Feb
